

NWCG CURRICULUM MANAGEMENT ISSUE PAPER #91
REMOVAL OF I-402, ICS FOR EXECUTIVES FROM THE PMS
April 25, 2007

BACKGROUND

I-402, ICS for Executives was developed in 1994 as part of the ICS curriculum. It was the intent of the Training Working Team to update the course after the other I course revisions had been completed.

CURRENT STATUS

The Emergency Management Institute (EMI) under FEMA has developed a G402, ICS Overview for Executives/Senior Officials course. The course is available for download at no charge on the EMI web site at <http://training.fema.gov/EMIWeb/IS/g402.asp>. It is intended to be delivered as instructor-led classroom training and is not a self-paced, self-study or computer based training course.

ACTION REQUIRED

Delete I-402 from the ICS Curriculum and the Publication Management System. Use the Field Manager's Course Guide to refer customers to the EMI web site for downloading of the course.
