

## **S-371, Helibase Manager (Applies to 2007 Version)**

The S-371 Instructor Guide (NFES 2885) incorrectly lists Helispot Manager as a student prerequisite for the course. Helispot Manager is a technical specialist position and is not required.

The pre-course test is based on the 2002 version of the IHOG, instructor must verify answers using the latest version of the IHOG and adjust accordingly.

IHOG references throughout the course will need to be updated according to the latest version of the IHOT. Instructors are encouraged to review their units and make updates prior to course presentation.

Unit 3, page 4 – the term “post operational briefings should be changed to “after action reviews”.

Unit 4, page 4.21 – verify current CFR.

Unit 5, page 5.31 – verify current FAR.

## **S-371, Helibase Manager (Applies to 2007 Version)**

A discrepancy has been found between the Pre-course materials available in Appendix D of the course materials CD (NFES 2887) and the Pre-course materials found on the NWCG Training website (<http://training.nwcg.gov/>). The specific differences relate to questions 6, 12, 34, and 35. After review by a subject matter expert it has been determined that the questions available on the NWCG Training website are more applicable to the Helibase Manager position.

All future courses should use the pre-course work materials found on the NWCG website.
