

I-100, Introduction to the Incident Command System (Applies to 2006 Version)

The CD based version of the I-100 course contains an error in Unit 3 - Incident Commander and Command Staff Functions Under the section titled Role and Function of the Command Staff - the last bullet under the description of the Public Information Officer states "Halting operations due to unsafe procedures (halting operations due to safety issues does not require the approval of the IC)." This bullet was misplaced and should be under the description of the Safety Officer.
